

# Jacob Kriss

(646) 954-0087 | jkriss@skidmore.edu | [jacobkriss.com](https://jacobkriss.com) | [LinkedIn](#) | [GitHub](#)

## Education

<b>Skidmore College</b> , Saratoga Springs, NY	Expected Graduation: January 2026
Major: Computer Science	
Minor: Business	
Major GPA: 3.4	

## Relevant Coursework

<b>Foundations of Machine Learning (CS316)</b>
<ul style="list-style-type: none"><li>Implemented machine learning algorithms using NumPy and PyTorch through hands-on labs</li><li>Built and evaluated ML models using gradient descent, support vector machines, and neural networks</li></ul>
<b>Software Design (CS226)</b>
<ul style="list-style-type: none"><li>Implemented logging and unit testing in large code bases, focusing on scalability and code quality.</li><li>Utilized design patterns, JUnit, and JaCoCo frameworks.</li></ul>
<b>Design and Analysis of Algorithms (CS305)</b>
<ul style="list-style-type: none"><li>Designed algorithms for complex problems, emphasizing time and memory efficiency.</li></ul>
<b>Business and Organizational Management (MB107)</b>
<ul style="list-style-type: none"><li>Developed business strategies, financial plans, and rollout initiatives, with an emphasis on collaborative project management.</li></ul>

## Relevant Experience

<b>Instructor, ID Tech</b> , Harrison, NY
June 2024–August 2024
<ul style="list-style-type: none"><li>Managed groups of students aged 14–18, fostering collaboration and engagement in technical projects.</li><li>Delivered machine learning courses covering foundational concepts in Python, TensorFlow Keras, NumPy, and data preprocessing.</li><li>Guided students through the development of hands-on projects, including neural networks and multithreaded applications.</li><li>Adapted teaching methods to accommodate diverse learning styles and technical backgrounds.</li></ul>
<b>Intern, JDM Import Co</b> , Manhattan, NY
June 2022–August 2022
<ul style="list-style-type: none"><li>Conducted detailed market and pricing analysis, identifying customer trends to drive product strategy.</li><li>Gained hands-on experience with MongoDB by assisting data analysts in storing, cleaning, and processing large datasets.</li><li>Supported project management tasks by organizing team deliverables and tracking milestones</li></ul>
<b>Store Employee, Mike’s Organic</b> , Stamford, CT
June 2021–August 2021
<ul style="list-style-type: none"><li>Coordinated order packaging and delivery with a focus on quality and timeliness.</li><li>Developed recipes to minimize food waste, collaborating with chefs to repurpose ingredients efficiently.</li></ul>

## Technical Experience

<ul style="list-style-type: none"><li><b>Backend Development:</b> Designed and deployed Flask APIs to support seamless backend operations and integration with cloud services. Proficient in building backend systems with Node.js and Flask, leveraging Object-Oriented Programming (OOP) principles to optimize code readability and ensure sustainable growth of backend infrastructure.</li><li><b>Database Management:</b> Managed data with NoSQL and SQL databases, focusing on efficient data modeling, query optimization, and scalable storage solutions for complex applications.</li><li><b>Cloud Computing:</b> Built scalable applications using AWS Lambda for serverless computing and EC2 instances for reliable hosting. Architected cloud solutions to balance performance and cost-effectiveness.</li><li><b>Agile Methodologies:</b> Adopted Scrum and Kanban frameworks to manage tasks, prioritize features, and ensure iterative and collaborative development cycles.</li><li><b>Collaboration and Adaptability:</b> Contributed to established codebases by collaborating with experienced backend developers, quickly learning and improving complex systems to enhance overall user experience.</li></ul>
---

## Activities & Achievements

<ul style="list-style-type: none"><li><b>3rd Place</b>, Kenneth A. Freireich Entrepreneurship Competition: Developed a multiplatform app and comprehensive business strategy.</li><li>Active Member, <b>Skidmore Codes Club</b>: Participated in hackathons, applying agile practices for team-based projects.</li></ul>
--

## Skills

<b>Programming Languages:</b> Java, Python, JavaScript, C, Rust
<b>Databases:</b> MongoDB, Firebase, MySQL
<b>Tools &amp; Technologies:</b> React, AWS, SQL, TensorFlow, NumPy, Linux, Excel, Node.js, Kanban, Git, Bash, Pytorch, Pandas, VUE
